Abstract: This study mainly explored the use of Discourse Markers (DMs) in journalistic writings and the factors that prompted the BSED English students of CVSC Maragusan to commit errors. This study employed the qualitative research. Ten (10) informants were part of the writing assessment and phone interview and were chosen through purposive sampling. For ethical considerations, this study underwent an ethics review before the data were gathered. Furthermore, to adhere to the Data Privacy Act, the identity of the respondents was held confidential. The Coding and thematic analysis were used in data analysis. The study's findings revealed that students have limited knowledge about DMs and their functions in basic writing. Additionally, the limited knowledge about DMs are the factors that prompted the respondents to commit errors in using the DMs in their journalistic writings. These findings imply that students should be taught more about the DMs, their types, and their proper usage in writing. With this, the incorporation of the DMs in the discussion should be given more attention, especially in writing class.

Keywords: Discourse markers, journalistic writings, error analysis.

INTRODUCTION

Writing is one of the four macro skills that is an important tool for learning since it aids learners in various ways, including comprehension of views and ideas. It develops the capacity for explaining and refining ideas both to others and to oneself (Sadiku, 2015). However, writing using the foreign language adds another layer of difficulty. Learning to write using the second language needs intentional and conscious teaching or direction for each linguistic aspect. To write sentences correctly, learners must be acquainted with many writing components, such as grammar, punctuation, and spelling (Safa, 2018). Additionally, awareness of DMs may greatly assist students in writing successfully. These discourse markers help to enhance the quality of writing and the readability of content.

The shared purpose of language usage may lead to general patterns of the linguistic structure being adopted by writing texts in different genres; however, as argued by (Javadi-Safa, 2018), language in writing discourse may be affected by disciplines or purposes and thus show variations in the actual application. Text-producers are needed to utilize DMs in a particular manner anticipated and approved by their text-receivers to create acceptable, natural, and communicatively successful texts. As a result, understanding the role of discourse markers as components that contribute to the acceptability, naturalness, and efficacy of texts is critical for anyone studying writings in any language.

In Compostela Valley State College (CVSC) Maragusan, an interview with some English instructors was conducted. Balmera (personal communication, 2021) asserted that English majors usually commit grammatical errors due to the inappropriate usage of DMs in their sentences. Lumayno (personal communication, 2021), a former instructor and student publication adviser, supported the claim, emphasizing students’ difficulties with their basic writing skills, specifically the repetitive errors in using DMs on student outputs.

Generally, the above statements persuaded the researcher to fill in the existing knowledge gap. Because writing coherently is necessary for conveying full information, it remains a required ability for all students and workers as they prepare for higher education or job. (Beyreli and Konuk 2018). Better communication, more structured writing, better comprehension of texts, and speech will result from the usage of DMs, which will improve learners' speaking, writing, listening, and reading skills. Also, Hamed

error analysis study. According to Fraser (1999) Discourse Markers Model, discourse markers can be categorized as elaborative markers, contrastive markers, inferential markers, and temporal markers. This study on the use of discourse markers in the journalistic writings of 2nd year BSED English students fell naturally under the qualitative research umbrella since its results will rely more on understanding the different markers used.

Additionally, the error analysis was based on Stephen Corder's Error Analysis Theory, which required that the corpora and use of discourse markers be analyzed beyond the sentential level. It will be used to analyze learners' errors in second and foreign language learning. This will be used since error analysis can provide insight into complex language development processes and a structured way to define, describe and explain student errors. (Jabeen, Kazemian, and Shabaz Mustafai, 2015).

### Table-2: (continued)

| On the other hand | Contrastive | “Additionally, Moderna, on the other hand, performed a segment where they made trials of study which includes healthy adults aging 18-55 that were able to be tests of the vaccine.”
| | | “On the other hand, the Moderna vaccine was 94% effective at preventing laboratory-confirmed COVID 19 illness in people who had evidence of being previously infected based on the evidence from a clinical trial.”
| However | Contrastive | “However, due to novelty of the disease and the vaccine itself, a few remain skeptical about the latter safety and efficiency.”
| | | “Filipinos with law status, mostly those in cities live with constant hunger pangs barely able to afford to eat three times a day, and some children go to school without breakfast. However, President Rodrigo Duterte aims to reduce the rate of poverty to 14% by 2022.”

### Table-3: (continued)

| Thus | Inferential | “Expected that as the clouds appear like a sea, it can only be found at the mountain. Thus, to get there, you can bring your autos or, more conveniently, your motorcycles.”
| | | “Thus, the point of healthy people getting the vaccine is so they don’t spread the virus and fewer chances to die from COVID.”
| | | “Thus, DENR initiate a program to rehabilitate Manila Bay that makes it controversial.”
| Firstly/First | Temporal | “Firstly, based on the evidence from clinical trials, the Pfizer-BioNtech vaccine was 95% effective.”
| | | “Here are five ways program to combat Poverty in the Philippines. First is greater access to education.”
| Hence | Inferential | “Hence, the FDA reviewers said that the two-disc vaccine ‘was highly effective’ in preventing symptomatic.”

### Table-4: (continued)

| Moreover | Elaborative | “Moreover, one encouraging finding with these two vaccines was that it appeared possible a single dose which was effective in preventing COVID 19.”
| | | “Moreover, we must pay tribute by at least letting them know that we value their efforts through staying at home.”
| | | “Moreover, Manila Bay is known as one of the most polluted bodies of water in the world.”
| Therefore | Inferential | “Pfizer Biotech and Madonna are two licensed vaccines currently available, both in the form of the known mRNA vaccine Messenger RNA. Therefore, their structure is almost the same, and the mechanism mode is also very similar.”
| | | “Therefore, the charge will be ‘dismissed for lack of probable cause’ as said.”
| | | “Therefore, Manila Bay Clean Up Program has been initiated by DENR.”

### Table-5: (continued)

| Furthermore | Elaborative | “Furthermore, the death of Christine Dacera happened at the party for welcoming New Year, January 1, 2021, when Christine was found her friends motionless as well as breathless on a tub.”
| | | “Furthermore, they call it ‘Battle for Manila Bay,’ and it is not a battle.”
| | | “Furthermore, they put sacrifices such as spending time beyond regular hours for emergency tasks.”
| | | “Furthermore, the government has implemented various programs and reforms to reduce poverty by targeting education, healthcare, and the overall economy.”

© East African Scholars Publisher, Kenya 218
In conclusion, Makati prosecutors successfully cleared their charges through the approval of a resolution by Deputy City Prosecutor Henry Salazar and City Prosecutor Dindo Ventuzara.

Finally, because of the efforts and initiatives, Manila Bay became what it is now. “Finally, they are considered heroes in disguise who remained faithful with their duties despite the risk.”

Second, greater access to healthcare, an effort which aims the healthcare system so that those who are in poverty will have more access to health services.

Third/Thirdly, is family aid to further efforts to support citizens, the government implemented the Pantawid Pamilyan Pilipino Program (4Ps) since 2007.

Fourth is an economic improvement. the infrastructure plan.

Lastly is Build Build Build, the initial goal is to complete the project in the infrastructure plan.

Out of the 30 articles written by the respondents, there are only 17 DMs found. These were categorized according to their subclasses, namely Elaborative, Contrastive, Inferential, and Temporal. Surjowati (2018) explained the definitions of each subclass.

Elaborative DMs are used to signal an elaboration of an idea. There were 4 elaborative DMs found in the articles, namely, additionally, moreover, and furthermore. Among them, furthermore was mostly used with 4 sentences.

Contrastive DMs are used to signal contradicting or opposing ideas from one segment to another. There were two contrastive DMs found in the articles, namely, on the other hand, and however. Both of them were used twice.

Additionally, Inferential DMs are used to signify that segment 1 has a basis for segment 2. In the articles collected, there were five inferential DMs found. These were because of this, thus, hence, therefore, and in conclusion. Among them, both thus and therefore were used thrice, respectively.

Temporal DMs are used to signal time. In the articles, there were 6 temporal DMs found. These were first/firstly, second, third/thirdly, fourth, finally, and lastly. Among them, finally was used twice in the articles.

The result shows that the most used DMs were, furthermore, and moreover, which are elaborative DMs, and thus, and therefore inferential DMs. This means that based on their writings, they mostly use DMs for elaboration and basis about something. This reflects to the idea that the respondents’ orientation in using DMs in writing focuses on using them as device for elaboration and conclusion of ideas in basic writing.

This is supported by Martínez (2004), who claimed in her study that these two DMs are the most frequently used in writing. Moreover, Kusumayati (2016) also concluded that students who usually use these DMs are the ones who score the best result in their writing tasks.

Table-8: Error Analysis of DMs in the journalistic writings of the BSED English students.

<table>
<thead>
<tr>
<th>Classification of Errors</th>
<th>Sample Statements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Misinformation</td>
<td>“Filipinos with law status, mostly those in cities live with constant hunger pangs barely able to afford to eat three times a day and some children go to school without breakfast. However, President Rodrigo Duterte aims to reduce the rate of poverty to 14% by 2022.</td>
</tr>
<tr>
<td>Addition</td>
<td>“Additionally, Moderna, on the other hand, performed a segment where they made trials of study which includes healthy adults aging 18-55 that were able to be tests of the vaccine.”</td>
</tr>
</tbody>
</table>
The data shows that the respondents commit three out of four errors. The first is omission. The sample statement has lacking details. The DM “meanwhile” became irrelevant, and the statement is not a sentence but rather a phrase. The second is mispronunciation. The sample statement uses the DM “however,” which is contrastive. The statement should be using an inferential DM instead of “therefore” to make the statement semantically correct. The third is addition. There are two DMs used in the sample statement, “additionally” and “on the other hand.” Since this excerpt does not show contradiction, the contrastive “on the other hand” should not be used. Moreover, there was no sample statement for misordering.

Therefore, this data shows that students commit mistakes using the correct or appropriate DM to be used in a sentence. There is confusion as to the functions of each DM. This result was supported by Faghiih (2015), who claimed that there are individuals who have insufficient knowledge on the selection and usage of DMs in writing. Al-khazraji (2019) further explained that the incorrect usage or the overuse of DMs negatively affects the transmission of message.

INTERVIEW RESULTS
The questions were designed to identify the respondents’ familiarity with DMs, how often they use them in their writings and what prompted them to commit errors in using DMs.

The researcher made use of an interview guide (see Appendix E) via telephone interview. This was used to gather the needed responses from the participants that are essential to this study.

The respondents were Lyn, Che, Ara, Mia, Mel, Jen, Jud, Mar, Ces, and Mae (pseudonyms). They were chosen due to the diversity they have, which is suitable for this study. All of them have differences in all factors that are gauged in this study.

Their responses were classified using thematic analysis. Below are the three themes: Discourse Markers as Connectors, Frequency in Using DMs in Journalism, Confusion among the DM Subclasses, and DMs as Accessories in Writing.

Discourse Markers as Connectors
Most respondents are familiar with DMs as “connectors” or “connecting words” for one idea to another during the phone interview. One of the respondents shared:

Ahm..kuan, familiar siya sa akua ma’am kay naaagian naman gud nako siya before ma’am, even sa kanang Senior High School nako na kuan na days until college. Na learn na nako ma’am. Gamiton nako siya ma’am kaning naa koy isumpay-sumpay na word. Kitahay kanang…especially kanang mga moreover…mga ing-ana gud ma’am? Kay connectors ma gud ang kanang

Discourse Markers tapos mao to kung kinahanglan nako siya kanang isumpay or kanang nay mga cause and effect…mga ingon ana gud ma’am? Kay ako ra siyang ginagamit jud, especially pag necessary najud siya, sa kanang gamitong jud siya. Kay importante man gud jud na siya sa writing.

They are familiar to me because I already knew about them during Senior High School until college. Every time I have to connect words, I use them every time, especially the word “moreover” because DMs are connectors. If I need to join or show cause and effect, I use DMs, especially if essential. Because DMs are necessary for writing.

- Mia -

Furthermore, other responses were asserted:

Familiar ma’am, kanang mga connecting words ma’am. Ginagamit namo sa research ma’am. Ano ma’am, if imuhang sentence is about nas laing tao, so mugamit kag kanang “on the other hand” nya naa pa kay laing isumpay. Nya pag i-addr na siya ma’am kay mugamit kag mga “moreover” mga ana ma’am.

They are familiar with connecting words. We use them in research. We also use them if your sentence is about other people. You will use “on the other hand.” Then if you have something to add, you will use “moreover” and others.

- Jen -

There are also responses that DMs are used for comparing as they exclaimed:

Kuan ma’am, kanang murag gigamit siya para maconnect ang sentence ma’am or kanang us ak a mag sugod, kay murag mag gamit ka ug Discourse Markers ma’am. Para sa akua ma’am kay kana bitawng mag compare ka ma’am. Example kay naa kay i-compare tapos mag gamit kag “on the other hand”…daghan man na ma’am noh? So mao na ma’am.

© East African Scholars Publisher, Kenya 220
I think they are words that are used to connect a sentence or before you start a sentence. For me, it is used, for example, if you are comparing something. You will use “on the other hand.”

- Jud -

Familiar ma’am, especially kung mag himog sentence, like that. Naagian pud nako siya sa high school ma’am. Mao ba nanag connecting words ma’am noh? Kanang sa comparing of ideas. Ana ma’am.

It is familiar, especially in making a sentence. It is used as connecting words and comparing oof ideas. I heard it from high school.

- Che -

Based on their answers, most of the respondents viewed DMs as connecting words, similar to conjunctions. And the term “connectors” implies showing cause-and-effect and combining ideas from one to another. Looking back on the DMs used in their journalistic writings, the way how they used them and how they describe their understanding of DMs are contradicting. Their responses showed that even if they are using DMs in their writings, they were not aware of the purpose of using DMs in writing, aside from the things they mentioned.

Moreover, their responses also reflected the idea that they were exposed to a different term for DM during high school, which is “connectors,” or associating them with conjunctions. Their orientation with these words or phrases’ functions in writing are to connect or link one idea to another, show cause-and-effect, and show contrasting ideas.

Shardama and Yakubu (2014) asserted that DMs are words commonly referred to as linking words/phrases and sentence connectors. They bind together a piece of writing and make them stick together. A sentence will not be logically constructed without sufficient DMs. Moreover, sentences will not be connected. In the same breath, Barnabas and Adamu (2012) suggested that the skillful use of DMs often implies a higher level of fluency of understanding and producing a language.

Frequency of Using Discourse Markers in Journalism

This theme discusses how often the respondents use DMs in their journalistic writings. Most of them answered that they always or most of the time use DMs in writing. One respondent expressed:

Ma’am, as often as possible, naga gamit gyud ko ug DMs if mag sulat ko. Kay para ma organize nako ug tarong akong mga ideas ma’am. Kay for example lahi na ug idea ang next paragraph, so need nako butangan ug connectors, or words na mag indicate kung nag support ba siya sa previous idea or nag contradict ma’am. Also, para makita ang flow sa akong idea ma’am.

I use them as often as possible in writing so that I can organize my ideas well. For example, the next paragraph has different idea, I need to use connectors or words to indicate if it supports the previous idea or not. Also, to clearly see the flow of my ideas.

- Mae -

Similarly, a respondent exclaimed that she always used DMs to connect one idea to another in journalism. She explained:

In journalism...kuan siya ma’am, kuan jud siya, perminte jud siya ginagamit ma’am. Kay daghan man gud ka i-connect kanang especially kanang mga stories, pareha anang stories sa kanang news, kay kailangan man nimo siya i-connect kay daghan mag kanang interview, kailangan man jud nimo siya gamiton ana ma’am. So perminte nako siya ginagamit.

It is always used in journalism because there are many ideas that you need to connect, especially in writing news stories and interviews.

- Mia -

Furthermore, while all of them answered with almost the same idea, two respondents elaborated their opinions. They both responded how they view the importance of DMs in writing with the following declarations:

Para sa ako ma’am, katong wala pakao kabalo nan aa diyay mga DMs ma’am, dili nako siya ginagamit tungod lge kay wala ko kabalo kung unsa siya ka importante. Pero katong nakabalo nako ma’am, kailangan gyud diyay siya gamiton permis ma’am. Na appreciate nako siya and na aware nako nga mao diay na siya ang mga ginatawag na DMs ma’am. Pag magsulat ko ma’am, na realize nga nako dapat gyud diyay gamiton siya para dili gani mag putol-putol ang idea ma’am? Kanang inig basa nimo ba kay dili ka mawala nga ay lahi na diyay ni ug idea diiri na part. Ana ma’am.

For me, I do not use DMs because I do not know what they are. But now that I am aware, I realized how important they are. I became knowledgeable, and I appreciated DMs in writing. If I write something, I should use DMs so that the connection of ideas will be obvious. It will also help the readers understand the change of ideas.

- Mel -

Para sa ako ma’am kay perminte gyud siya gamamit ma’am. Kadaghan jud siya gamamit. Kuntahay naa kay mga daghang panghitabo na makuwan, mag gamit jud ka ana ma’am kay mao man nay gamiton para ma connect ang mga panghitabo ma’am.

For me, DMs are always essential to use. They are used to connect and show sequences of events.

- Ara -
Based on their responses, DMs should always be used in writing. These help them connect their ideas and show transitions of topics.

One of the characteristics of DMs is connectivity. Asik (2015) claimed that DMs are used to establish a relationship between the previous utterances to the new one. This is the most common notion about the usage of DMs in writing. While DMs have many functions in writing discourse, students commonly used them as 'glue' to link ideas. Further, they commonly use these as indicators for changing the concept in a text. Aidinlou and Shahrokhi (2012) also affirmed that DMs as the binding elements of a text creating a meaningful discourse have been viewed from different dimensions in language studies.

The data shows that even with limited knowledge of DMs, students use DMs in their journalistic writings to emphasize an idea. By using ‘connecting words,’ they will show further the flow of their ideas in written discourse.

Confusion among the Discourse Markers Subclasses

While all of them agreed to the idea that they always use DMs in writing, they also revealed that they, too, commit errors in using them and what prompted them to. Most of them said that being unconfident and unsure of what DM they should use is why they commit an error in using such.

For one respondent, she was still struggling with what exact DM she should use in conclusion as she opened:

Sometimes, I feel uncertain of the words I used. I usually commit error in using words like moreover, and furthermore. Especially in the conclusion part, because sometimes I feel like the words I use are inappropriate. It also depends on the kind of writing I am. The easiest for me is writing a cause-and-effect concept. But in writing the conclusion, I get confused about whether to use “therefore” or “in conclusion” since there are a lot of them.

Moreover, most of the respondents exclaimed that the confusion among DMs prompts them to commit an error. Since there are a lot of DMs, their confidence in using these words in writing becomes low. They are very conscious about the appropriateness of the usage as they explained:

Ma’am mamali gud ko sa pag gamit ana ma’am ay. Malibog man gud ko sa kadaaghan sa kuan ma’am…kanang mga examples bitaw niya ma’am. Usahay kay dili paka familiar gyud sa mga nagkalain-lain na DMs gyud ma’am ba. Dili ka hawd mahinamdom kung unsa ang pwede magamit para dili siya balik2x sa imong paragraph.

I usually commit errors in using DMs in writing. I am confused as to what particular DM I should use because there are a lot of them. I am not good at memorizing to avoid the redundancy of DMs.

For me ma’am, yes ma’am. Kay there are a lot of examples of such discourse markers ma’am and I think na as a student, I aslo commit errors and I cannot determine what really is the appropriate DM to be used ma’am. Kuan man gud ma’am, tungod sa kadaaghan ug examples ma’am na halos pare-parahas lang gani ug meaning ma’am? Malibog ka unsa gyud na word ang tama para mu connect ana na sentence ma’am.

Yes ma’am. Because there are a lot of DMs, and as a student, I still commit errors. I cannot determine what is the appropriate DM to be used. Because there a lot of them, some may have almost the same meaning. This makes me confused if the word that is used is correct for a particular sentence.

Kuan, sometimes I’m not really sure if kung kana ba siya na DM ma’am kay kanang correct ay kuan ba siya ani ma’am, kani na flow. Kay daghan man gud siyaay pwede magamit ma’am. Dapat kato gyud appropriate sa journalistic writings dapat kato gyud gamiton kay usahay mamalig gamit sa kadaaghan pud. Nya usahay ma tempt mag gamit ug mga words para dili mag balik2x una malay diay to semantically.
Sometimes, I’m unsure if this DM is appropriate because it has many functions in a sentence. It should be the most appropriate one to be used in journalistic writing. Another thing is that sometimes, we are tempted to use other synonymous words just to avoid redundancy, without thinking if it is semantically correct or not.

- Che -

Meanwhile, other respondents expressed that DMs should be discussed more in class. This will help them become more aware of when and how to use these words as they said:

Ma’am, malibog gyud ko sa tinuod lang. Bisan pag naka agi nami ani sa high school noh, pero kalang pagyud. Karon gud nga naga ask ka sa akua ma’am, sige kog huna-huna nga dili gyud diuy enough ang akong natun-an. Kumbaga, natapsingan rani ma’am sa una. Unya…kuan, ma’am pwede mu suggest? Hehe! Kanang ma’am basin pwede unta ma discuss ni further na topic sa amuang major ma’am, especially nga daghan mig writings puhon. Like sa Campus Journ nato ma’am oh. Sige mig sulat pero kanang wala kaayo mi pake ana ma’am ba. Unya gamit diay man kaayo namo ni. Ulaw kaayo ma’am sige mi kamali unya English majors mi. Hahaha!

I still get confused with this topic even though we already discussed this in high school. Now that you are asking me about DMs, I became so conscious about how much I do not know about them at present. It’s like we just randomly touched this topic without digging its core. May I suggest!? *laughs* Maybe this topic may be discussed further in our significant courses, especially since we have many writings to do in the future. Like in Campus Journ, we always write articles, but we don’t care about using DMs, while these are supposed to be very useful. It’s a pity that we do not know much about DMs though we majored in English. *laughs*

- Ces -

In the statements mentioned above, it is evident that they lack basic knowledge of DMs. Even though most of them use DMs in writing, there is still confusion about the appropriateness of usage. Moreover, it was depicted that they also get confused about which DMs they should use since many of them.

In this manner, when one fails to use DMs properly or appropriately in writing, there will also be a failure in conveying the text's message. Hence, the coherence and cohesion in the pragmatic and semantic levels will also be affected. Since DMs in writing are essential to technical writing, misused DMs will most likely result in incoherence. Thus, their basic writing skills will be affected as a whole.

These factors prompted the respondents to commit errors in using DMs in their journalistic writings. As a result, it will affect the message of the text itself. It may lead to a misunderstanding of the meaning of the text. The mistake of the use of DMs disturbs the writing styles of the students directly. Therefore, these markers facilitate understanding of the written text (Al-khazraj, 2019).

Discourse Markers as Accessories in Writing

While most of the responses coming from the participants discuss their confusion with the different types or subclasses of DMs, there is one response that tells more about how DMs function in his writing as he confessed:

Ma’am, kanang bisan naga gamit ko ani sa pagusulat ma’am noh kay feeling nako mali akong pagka gamit. Murag pampanindot ra siya ma’am ba. Murag para hawd kaway musulat tan-awon pero diuy to, mali. Maong mamali kog kuan ma’am…gamit ana kay gamit rako dretso bisag unsa kutob sa mahinumduman pero di ko sure kung mao ba gyud dapat. Siguro tungod kay kalang akong prior knowledge ani ma’am ba. Unta ma discuss ni sa among klase sunod ma’am noh para mu hawd gyud mi ma’am kay feeling nako basic ni nga dapat namo mahibal-an pero wala diay mi kabalo ma’am.

Even if I use DMs in writing, I still feel that I fail to use them correctly. They are just like decorations to make my writings appealing, but they do not make sense in reality. I commit mistakes because I use DMs for as long as I can remember, without thinking of their appropriateness. Maybe because I lack enough prior knowledge about them, I hope this topic will be discussed further in our class because I believe this is one of the basics, but still, we fail to understand them.

- Mar -

Aside from the fact that there were confusions among the various types of DMs, another idea came, which is problematic. Mar only used DMs to do his writings somewhat appealing to the readers when in fact, they would not. The misuse of DMs or even other cohesive in basic writing does not make an article or a written output appealing or fancy. This will only lead to misunderstanding of the message to be conveyed by the writer to the reader. Same with speaking, a writer must also consider the target audience or the readers of their output.

In this sense, in writing, on the other hand, it is reasonable to presume that the writer is the only one who interacts with the texts during the writing process. In this scenario, the author or writer may need to consider the reader's perspective. He/she may need to play both the writer and the reader to persuade themselves that they are the ones reading their ideas (Aijmer et al., 2011).

Moreover, DMs play an essential role in achieving socially situated language communicative objectives in written and spoken discourse and include
several different parts of coherence and structure (Wang & Guo, 2014). However, despite extensive research on the functions and uses of DMs, one aspect has not yet been fully understood, namely, the factors that motivate the combination and the order of individual DMs in their sequences involving two or more adjacent elements like, but anyway, well I think or no well but actually, a phenomenon known as clustering (Heine, Kuteva and Kaltebock, 2014).

CONCLUSION

Based on the participants' responses, it was found out that they only have limited knowledge as to what DMs are and what are their functions in writing. All of them can use DMs in their journalistic writings, but not all were competent. Moreover, the respondents' orientation with DMs was limited to using them as connecting or linking words to show ideas and show comparison and cause-and-effect relationship. They often compare DMs with conjunctions.

Additionally, they often use DMs in writing without really knowing whether they used them correctly or not. This is because they lack prior knowledge. Most students commit mistakes during high school and college because teachers used other terminologies of DMs like subordinators, conjunctions, conjunctions, and transitional devices.

The data also showed that DMs were used in their journalistic writings placed inappropriately in a sentence. In the error analysis, it is evident that the students are not aware of the types of DMs and their specific functions in the text. The use of DMs for them, aside from what is mentioned previously, makes their sentences appealing.

To sum it all, basic writing skills employ the procedure of a good written text and depict and value coherence and cohesion. Composing many sentences appealing. several different parts of coherence and structure (Wang & Guo, 2014). However, despite extensive research on the functions and uses of DMs, one aspect has not yet been fully understood, namely, the factors that motivate the combination and the order of individual DMs in their sequences involving two or more adjacent elements like, but anyway, well I think or no well but actually, a phenomenon known as clustering (Heine, Kuteva and Kaltebock, 2014).

the difficulties of engaging themselves with DMs and identifying their different functions in the text. This will help the students improve their writing skills and remediating the errors they usually commit in using DMs.

This study should be their basis for reviewing the syllabus and English language teaching guide, particularly in writing for the school administration. With the protocols in the curriculum, the contents of the lessons should be thoroughly evaluated to ensure that this case will be addressed. Likewise, in Journalism, this study should be the basis of improving the quality of journalistic writings, incorporating the appropriate DMs.
